

INDEPENDENT CONSULTING PROPOSAL

SAHAR FEIZ

OPERATIONAL & GROWTH CONSULTING

CONSULTING PROPOSAL

Prepared for One World Global

Prepared By:	Sahar Feiz, Independent Consultant
Proposed Start:	June 1, 2026
Document Type:	Consulting Proposal
Classification:	Confidential

1. Executive Summary

I am pleased to submit this proposal to partner with **One World Global** (“OWG”) on a fractional basis, focused on strengthening the interpreter pipeline, improving interpreter engagement and retention, scaling operational delivery, and supporting client acquisition and growth.

The language services market rewards two capabilities above all others: **coverage you can count on** and **interpreters who stay**. This engagement is built to move both metrics in measurable ways, while creating the operational scaffolding OWG needs to absorb new client volume without service degradation.

The thesis: OWG’s next phase of growth is gated less by demand and more by the strength, responsiveness, and scalability of its interpreter operations. This engagement is structured to remove that gate.

2. About the Consultant

I am an independent consultant with deep operational experience in language services — partnering with LSPs and operationally-driven businesses to scale their interpreter networks, sharpen delivery operations, and accelerate client growth.

- Deep operational expertise across interpreter recruitment, vendor management, and coverage optimization
- Hands-on, execution-oriented approach — not slide-deck consulting
- Track record of building scalable interpreter pipelines across priority and low-diffusion languages
- Strategic perspective informed by frontline experience inside LSP operations

3. Engagement Overview

I will provide **fractional operational and growth support** for One World Global, anchored across four interlocking focus areas:

1. Interpreter Recruitment

Pipeline strategy, sourcing execution, and language-demand alignment

2. Interpreter Engagement & Care

Retention, communication, responsiveness, and onboarding experience

3. Operational Support & Scaling

Workflows, coverage optimization, and vendor structure

4. Client Acquisition & Growth

Positioning, onboarding readiness, and scaling go-to-market capacity

This engagement is designed to operate **inside** OWG's day-to-day rather than alongside it — producing tangible operational outputs, not just recommendations.

4. Scope of Support

1. Interpreter Recruitment Strategy & Execution

- Recruitment planning aligned to language demand patterns and operational coverage gaps
- Recruitment workflow optimization (intake → vetting → onboarding → activation)
- Hands-on interpreter sourcing support across priority languages
- Outreach strategy design — channels, messaging, and sequencing
- Identification and targeted sourcing for priority and low-diffusion languages
- Recruitment process scalability recommendations as request volume grows

2. Interpreter Engagement & Interpreter Care

- Interpreter engagement initiatives that drive retention and affinity
- Retention strategy development informed by interpreter feedback and attrition signals
- Interpreter communication workflows (announcements, updates, coverage requests)
- Coverage and responsiveness improvement strategies
- Best practices around interpreter onboarding experience
- Support with interpreter performance and engagement monitoring

3. Operational Support & Scaling

- Operational workflow recommendations across the interpreter lifecycle
- Onboarding process improvement (time-to-first-call, completion rates, compliance)
- Queue and coverage optimization guidance
- Vendor and interpreter operational structure recommendations
- Escalation and communication process support

4. Client Acquisition & Growth Support

- Client-facing operational positioning and messaging
- Onboarding readiness for new clients (capacity, language coverage, SLA posture)
- Strategic support for scaling operational capacity to match commercial growth
- Support with presentations, messaging, and growth initiatives as needed

5. Approach & Working Model

- **Embedded, not external.** I operate as a fractional extension of OWG’s team — participating in workflows, not observing them.
- **Outcome-led.** Each focus area is tracked against agreed operational signals (e.g., active interpreters, coverage rates, response times, onboarding velocity).
- **Cadence-driven.** Weekly working sessions, monthly priority reviews, and asynchronous execution between touchpoints.
- **Adaptive scope.** The engagement adjusts to operational priorities as they evolve through the quarter.

6. Engagement Structure & Investment

Monthly Retainer	\$6,000 USD / month
Time Commitment	25–30 hours per week
Proposed Start Date	June 1, 2026
Billing Cadence	Monthly, invoiced at the start of each month
Payment Terms	Net 15 from invoice date

This is an **independent consulting engagement**. This Proposal does not constitute an offer of employment, partnership, or agency relationship.

7. Communication & Availability

- **Channels:** Ongoing communication via email, WhatsApp, and scheduled meetings
- **Working hours:** Operational and strategic support during agreed working hours, aligned to

OWG's coverage windows

- **Urgent matters:** Priority responsiveness for urgent operational matters when reasonably possible
- **Cadence:** Weekly check-ins and a monthly written summary of progress, priorities, and recommended next steps

8. What Success Looks Like

While precise targets will be calibrated jointly during the first two weeks of the engagement, success is anticipated to be measured against signals such as:

- Growth in active, deployable interpreters — with particular emphasis on priority and low-diffusion languages
- Reduction in coverage gaps and improved interpreter response times
- Faster interpreter onboarding (time from application to first eligible assignment)
- Improved interpreter retention and engagement signals
- Operational readiness to absorb new client volume without degradation of service quality

9. Notes & Assumptions

- This engagement is structured as an **independent consulting engagement** and does not constitute employment.
- The scope of work may evolve based on operational priorities and business needs identified during the engagement period; material changes will be confirmed in writing.
- OWG will provide reasonable access to systems, data, and stakeholders required to deliver the scope effectively.
- All work products, recommendations, and deliverables are confidential and are owned by OWG upon payment of the relevant invoice, consistent with the terms of a separate consulting agreement to be executed alongside this Proposal.

10. Next Steps

1. Execute a short consulting agreement memorializing the terms described above

2. Kick off the engagement on the proposed start date with a working session to confirm focus areas and operational baselines

CONFIDENTIALITY NOTICE: This Proposal contains confidential and proprietary information belonging to Sahar Feiz and One World Global. Unauthorized disclosure, copying, or distribution of this document or the information contained herein is strictly prohibited.
